

SecureVault CTF Hints

22PC25 Nithin S

22pc37 Vengateshwaran k

This handout keeps the challenge player-friendly. It tells you where to look and what kind of analysis to use, without giving the solved flag values.

Flag 1

Question: A careless developer left a secret in plain sight.

Flag 2

Question: A hidden value is seeded into a secret system table.

Flag 3

Question: There is a ghost admin account hidden in initialization code.

Flag 4

Question: The ghost admin has a stored vault credential that only looks encrypted.

Flag 5

Question: A suspicious static IV hides another puzzle.

Flag 6

Question: Metadata in the manifest contains an encoded secret.

Flag 7

Question: A packaged config file inside the APK leaks a token.

Flag 8

Question: The password generator contains a hidden UI branch.
